Orbit Labs Operations Manual

Sample document for testing the VoiceFlow Agent knowledge base. All names and facts are fictional.

1. Company Overview

Orbit Labs is a software company founded in 2019 with its headquarters in Lahore, Pakistan. The company currently has 84 employees across engineering, support, sales and operations.

The chief executive officer is Amna Rauf. The chief technology officer is Daniyal Sheikh, and the head of customer support is Hira Baig.

Orbit Labs builds Helios, a satellite imagery analytics platform used by agriculture and city planning teams. Helios turns raw satellite images into field health maps, flood risk maps and land use reports.

The company mission is to make earth observation data usable by teams that have no data science background. Orbit Labs has two offices: the main office in Lahore and a small engineering office in Islamabad.

2. Customer Support Policy

Customer support is available from 08:00 to 20:00 Pakistan Standard Time, Monday to Saturday. There is no support on Sundays except for priority 1 incidents.

Tickets are classified into three priority levels. A priority 1 ticket means the platform is down for a customer, and the team must respond within 15 minutes. A priority 2 ticket means a major feature is broken, with a response time of 2 hours. A priority 3 ticket covers questions and minor bugs, with a response by the end of the next business day.

If a ticket is not resolved within the target time, the agent must escalate it by emailing escalations@orbitlabs.example and copying the head of customer support.

Customers can open tickets through the Helios help portal, by email, or by phone. Phone support is only available for Enterprise customers.

3. Information Security Rules

All company laptops must use full-disk encryption. Employees must connect to the company VPN, called OrbitGate, whenever they work outside the office.

Multi-factor authentication is mandatory for every company account. Passwords must be at least 14 characters long and must be changed every 90 days. Passwords may never be shared, even with managers.

Any suspected security incident must be reported to the security team within 12 hours. A lost or stolen access badge must be reported to the facilities team within 4 hours.

Customer data may only be stored in the approved storage service named Vaultline. Copying customer data to personal devices or personal cloud accounts is strictly forbidden.

4. Helios Pricing and Plans

Helios is sold in three plans. The Starter plan costs 49 US dollars per month, includes up to 5 users and 10 GB of storage. The Pro plan costs 199 US dollars per month, includes up to 25 users and 200 GB of storage.

The Enterprise plan has custom pricing, unlimited users, phone support and a service level agreement guaranteeing 99.95 percent uptime.

Customers who pay annually receive a 15 percent discount. Refunds are available within 30 days of the first purchase, and only for the first purchase.

Educational institutions can apply for the Campus discount, which reduces the Pro plan price by 40 percent after verification of their institutional email domain.

5. Software Release Process

Orbit Labs ships a new Helios release every second Tuesday. A code freeze starts 48 hours before each release, and only critical bug fixes are allowed during the freeze.

Every release is first deployed to the staging environment named Nebula for testing. The release manager, Tariq Mehmood, approves the move from Nebula to production.

After a production release the team has a 2 hour rollback window. If a critical problem is found within this window, the release is rolled back immediately.

Helios uses the versioning scheme MAJOR.MINOR.PATCH. The current production version is 4.7.2.

6. Travel and Training Budget

Employees must book economy class for flights shorter than 6 hours. Hotel stays are capped at 120 US dollars per night, and the daily meal allowance is 35 US dollars.

Any business trip with a total cost above 1,500 US dollars needs approval from the chief financial officer, Saad Qureshi, before booking.

Every employee receives a training budget of 800 US dollars per year. Unused training budget does not carry over to the next year.

Travel receipts must be uploaded to the finance portal within 14 days after the trip.
